

The Elevation of Opulence

The Take off Opulence Aesthetic Medicine began as the brainchild of its Founder and Medical Director, Dr. Nedra Dodds. Although her career was steeply rich in traditional medicine, Dr. Dodds felt a personal void in patient care, and sought new and innovative ways to improve the classic doctor-patient relationship. Her transition into the field of anti-aging medicine blossomed into the area of cosmetic surgery where her passion was discovered and thus a journey to help others achieve their goals of health and beauty began. The Flight Opulence and Dr. Dodds' plans began to take flight as they fulfilled the mission statement of "Health is Your First Wealth". The practice of Opulence Aesthetic Medicine originated in Acworth, GA in 2006 and has grown into an international presence with over 5,000 patients. Quickly becoming one of the most sought after physicians in her field Dr. Dodds has been a monthly contributor to one of West Cobb's largest circulating magazines for over 4 years. Often requested for her expertise in the field she continues to educate patients on preventative measures about anti-aging medicine, and provides articles for other publications as well. She has been featured on CBS radio and NBC Atlanta affiliate, WXIA. The accomplished physician has also been featured on NBC network's program, Modern Healing and has upcoming productions on Bravo television and CBS news. The practice itself has attracted like minded paraprofessionals and currently provides a full array of med spa services with on-site therapeutic massage, Permanent Makeup, skin services, weight management and innovative techniques for facial and body rejuvenation. Nedra's modern

yet proficient approach has allowed her to be considered one of the best in the industry. Her peers voted her as the "2010 Best Overall Body Makeover" Award winner at The Aesthetics Show in Las Vegas. The category highlights the best use of combination technologies and surgical procedures. Dr. Dodds has been chosen by several companies for physician training within the field of aesthetics, and is pleased to be a part of multi-center research project looking at the health benefits of a current aesthetic treatment.

The Journey The new facility for Opulence Aesthetic Medicine personifies the journey of Dr. Dodds to improve the patient experience, while delivering the highest form of medical care. The opulent design of the office has patients as the primary focus with every aspect of the structure strategically planned to enhance relaxation. It also provides a soothing and safer work environment for the staff. The eco-friendly and sustainable layout is carried throughout the facility from the spa side to the surgical suites. Opulence Aesthetic Medicine has added an exclusive amenity with new private label products made natural ingredients and no harmful preservatives, along with a line of preservative free medical grade mineral make-up. Opulence is in the final process of obtaining certification from the US Green Build Council making it the state of Georgia's first LEED Certified Med Spa and Cosmetic Surgery Center. As we "**elevate to new heights**" our goal is to ensure that each patient receives the ultimate Opulence experience.
